EXPERIENCE

Software Development Specialist   SEPTEMBER 2017 - Present

Rasyotek Human Resources and IT Inc. - Istanbul, Turkey

- Rasyotek Human Resources offers business solutions for government incentives, payroll services and reporting to most known companies of Turkey.
- In software development team I'm responsible for developing new features and improve existing features from backend to frontend. Also head developer of a recruitment project that used by various companies to find new employees. Most of our projects talks with each other via web services and they are written with ASP.Net MVC in backend and JS/HTML5 in frontend.
- Our team is mainly using entity framework in our projects and REST API's to communicate and maintain data integrity between projects.

Software Developer Intern   JANUARY 2016 - MAY 2017

Matchback Systems - Green Bay, WI

- MatchBack Systems is a SaaS provider that aims to reduce costs of shipping and improve efficiency for logistic companies.

- During my internship I involved in two database projects; a customer database project to merge customer infos from different databases and store them in an optimized database and as second an automation project of monthly analysis reports of companies.
- I used MS Excel and VB.Net on both projects to provide our needs by following my supervisor's directives.

Technical Support - Intern   JANUARY 2014- MAY 2015

ETIBOR - Balikesir, Turkey
- ETIBOR is Turkey's largest chemical producer and exporter company
- Worked as a Technical Personal in Human Resources Department.
- Provided software and hardware support to employees.
